Luis Javier Elizarraras Ascencio

Welcome to my portfolio website! I am a passionate software engineer who wants to create innovative solutions and push the limits of technology. With a deep love of coding and problem solving, I am constantly seeking opportunities to learn and grow in this ever-evolving field.

I am currently studying my last year of a bachelor's degree in engineering at Software. I have built a solid foundation in software development, particularly in areas such as Java, SQL, C++ and CSS.

My experience in these areas allows me to approach projects with confidence and deliver quality results. I strongly believe in the value of continuous learning and staying adaptable in the ever-evolving world of software engineering.

I actively seek opportunities to expand my knowledge and skills, adopting new technologies and approaches. Feel free to explore my work and get in touch if you have any questions or opportunities to collaborate.

Hard skills

Fron end = experience

Java → 80%

SQL → 70%

C++ → 70%

Html → 60%

JavaScript → 60%

CSS → 50%

Soft skills

- Communication Skills
- Problem-Solving Abilities
- Team Collaboration
- Adaptability
- Time Management
- Attention to Detail
- Empathy
